**Paris MoU and Tokyo MoU joint concentrated inspection campaign (CIC)
on emergency systems and procedures**

The Paris and the Tokyo MoUs have announced launching of joint CIC on emergency systems and procedures commencing on 1 September and ending on 30 November 2019.

The main objectives of this CIC are to ensure that:

1. ships are capable of responding appropriately and promptly to emergency situations in order to preserve human lives, protect the marine environment and minimize damages to ships;
2. necessary measures are taken by responsible stakeholders, such as shipping companies and ship managers having a direct influence on the safety of ships and by raising their awareness of the importance of ship emergency systems;
3. emergency systems installed on board can be properly operated and effectively managed in any emergency situations; and
4. master and crew of the ship understand their assigned roles and duties in case of emergency and enhance their familiarity with the situations so that they can act immediately when circumstances arise.

Port State Control Officers will use a questionnaire consisting of 11 questions in order to assess whether the equipment onboard complies with the relevant Convention, the master and the officers are qualified and familiar with operations related to shipboard emergency systems and whether the equipment is properly maintained and in functional condition.

If deficiencies are found, action by the port state may vary from recording the deficiency and instructing the master to rectify it within a certain period, to detention until serious deficiencies have been rectified.

A ship will be subject to one inspection under this CIC during the period of the campaign.

CIC questionnaire is attached.
